Colors Available: BLACK BLUE RED

MultiSurface™ pre-inked stamps are designed to work without the use of a separate pad; however it is still a specialty product that requires proper care to maintain and prolong the life of the stamp. MultiSurface™ pre-inked stamps utilize an alcohol based ink providing quicker drying time on most surfaces. Some surfaces may have a special coating that slow the drying time and/or affect the print quality. We suggest you test a sample piece in an inconspicuous location before stamping the desired area.

MultiSurface™ pre-inked stamps are designed to work without the use of a separate pad; however it is still a specialty product that requires proper care to maintain and prolong the life of the stamp.

MultiSurface™ pre-inked stamps utilize an alcohol based ink providing quicker drying time on most surfaces. Some surfaces may have a special coating that slow the drying time and/or affect the print quality. We suggest you test a sample piece in an inconspicuous location before stamping the desired area.

Proper Care

We recommend adding a few drops of ink when the impression appears to be weaker. This routine will also increase the life cycle of the stamp. Never allow the stamp to completely dry out, it may be impossible to bring it back to life. Never over ink or you run the risk of ink overflowing and creating a mess. See below for re-inking instructions and the amount of ink to add.

Storage

You should always have the bottom cover in place when not in use! Failure to do so will cause the ink to evaporate quickly. You should also keep the stamp in an upright position. If it becomes necessary to store a stamp for any period of time, add a few drops of ink in each hole prior to storage and a few more once a month to prevent the stamp from drying out completely. The use of an air-tight bag, such as a Ziploc®, can help reduce the rate of evaporation.

Cleaning

In case of ink spillage or a misplaced imprint, it may be impossible to clean a porous surface. For non-porous surfaces, you can use 70% or greater isopropyl alcohol.

Warning

Not intended for use on skin. Keep out of reach of children.

Features:

- Water Resistant • Thousands of Impressions, When Properly Maintained • Re-Inkable
- Multiple Sizes Available • Spring Action for Ease of Stamping • Dust Cover to Keep Clean and from Drying Out

RE-INKING INSTRUCTIONS

Dust cover must remain in place when not in use to prevent ink from evaporating!
